

# CyberLink Power2Go 6 Corporate Burning Edition

The disc burning enterprise solution supporting easy deployment and centralized IT management.

- Easy drag-and-drop burning ensures that even inexperienced users have the power to burn at their fingertips.
- Password protection and data encryption enhance the security of essential business data.
- Support for DVDs (DVD-R/-RW/+RW/RAM) and CDs offers compatibility with a broad range of office-based disc burning equipment.
- Windows Vista and XP compatible.

## Power2Go Features:

### Drag-and-Drop Burning

- Windows Gadget — drag-and-drop then burn files directly via the Windows Vista Sidebar.
- New-look interface — enjoy the easier navigation and cleaner design of Windows Vista.
- Quick steps — drag complete folders or individual files in one easy step.

### Safeguard Your Business Data

- Secured data discs — add a password to specific files or folders and encrypt to ensure better protection.
- Disc copying — create perfect duplicates of your discs.
- Erase disc and disc image utilities — save or burn disc images, erase and re-use re-writable discs.

### Burn and Store Work Files on DVDs

- Data burning — PowerPoint, Excel, Word...burn a huge amount of data to disc, on CDs and DVDs.
- Mixed media CDs — burn data files and audio files onto the same disc, play your music on your CD player, then access data on your PC.
- Creation of Audio CDs — create compilation CDs.
- MP3 ripping and audio file conversion — quickly create files for playback on a music player or PC.

### Search and Burn

- Simplified burning process — find files in an instant, search using tags or titles.
- Disc capacity bar — manage the number of files you can burn for your current disc media using the easy-to-read capacity bar.
- Burner settings — take control of the burning process with speed, data settings, auto-run, and other burning options.

**Enjoy 50% off Power2Go**

when purchased with PowerDVD
